

Massive Cell Phone Call Savings

70% of today's phone calls are made to a cell number. Lets say on a monthly bill of **R1,500** the cell phone portion would then be **R1,050**. Now if you are paying 90c / min and NOT R1.89 from a Telkom land line you get an immediate **53% price reduction**. This represents a saving of R 556 per month. Add the landline to landline calls which will be the remaining **R450** means your new effective bill would be **R944** giving you an instant rand saving of **R 556** off your bottom line. Using the above example the phone is paid for within the first 2 months once your VAT is deducted and will then provide you with a **net saving** of **R 5,368** in your first year. (Including the cost of purchase)

At the same usage a net saving of **R 6,667** in your second year which means a combined .. **2 year Saving** of **R 12,034**

Save money fast, look at how much money you can save starting today

Monthly Phone Bill	500	750	1,000	1,500	2,000	3,000
70% Cellular Calls	350	525	700	1,050	1,400	2,100
90c/min not R1.89	-165	247	330	-494	-659	-989
BlinQ Save on Cell	185	278	370	556	741	1,111
New Bill	315	472	630	944	1,259	1,889
Phone Purchase	-1,299	-1,299	-1,299	-1,299	-1,299	-1,299
Year 1 Saving	R923	R2,034	R3,145	R5,368	R7,590	R12,034
Year 2 Saving	R2,222	R3,333	R4,444	R6,667	R8,889	R13,333
Net Saving in 2 Years	R3,145	R5,368	R7,590	R12,034	R16,479	R25,368

* This is an example we have constructed, you may very well achieve even better savings. All amounts quoted above are in Rands and would only be applicable to South African savings. The figures are a guide line to indicate the value our new products adds and should not be used or quoted in any financial forecasting, budgeting and or calculations.
